# AKASH

Ambalpadi, Udupi-576103 | 8197662038 | akashkunder1020@gmail.com | https://github.com/Akashkunder20

## PROFESSIONAL SUMMARY:

MSc Computer Science graduate aiming to grow as a Full-Stack Developer, with hands-on experience in building responsive web applications and working with backend and database tasks. Skilled in C, C++, HTML, JavaScript, Java, MySQL, and intermediate-level Python. Developed practical projects including a Weather Forecasting application using React JS and real-time APIs, with a good understanding of AI/ML concepts and machine learning models applied in academic work. Highly motivated, adaptable, and eager to learn while contributing to realworld software solutions.

## TECHNICAL SKILLS:

- **Programming Languages:** C, C++, Java, Python.
- **Web Development:** HTML, CSS, JavaScript, Node.js, React.js.
- **Database Management:** MongoDB, MySQL.
- **AI/ML:** Machine learning fundamentals, Model training concepts.
- **Tools/ Platforms:** Git and GitHub, VS Code.
- **Soft Skills:** Teamwork, Time management, communication, Analytical thinking, Quick learner.

## PROJECTS:

**College Website – Museum Module (Frontend | MERN Stack)**

- Developed a responsive and user-friendly Museum module using React.js as part of a MERN stack college website.
- Implemented reusable React components to display museum information, images, and content with consistent UI design.
- Designed a visually rich and interactive UI using modern CSS techniques such as Flexbox, gradients, animations, hover effects, and structured navigation.
- Ensured a clean UI structure with smooth navigation and consistent user experience across different devices and screen sizes.

**Stock close price prediction using Machine Learning (Mini Project) |M.Sc. Computer Science**

- Compared multiple machine learning models (XGBoost, SVR, and LSTM-Attention) for stock price prediction using historical data.
- Concluded XGBoost as the best-performing model based on accuracy and stability, and trained it on processed market data.
- Built a user interface that uses the trained XGBoost model to predict the next day closing price of any stock.

## EDUCATION:

**Mahatma Gandhi Memorial College, Udupi | Master of Science in Computer Science** **2024-2026**

- **Major**: Computer Science
- **CGPA**:**8.22**

**Mahatma Gandhi Memorial College, Udupi | Bachelor of Computer Application** **2021-2024**

- **Major:** Computer Science
- **CGPA:8.46**

## CERTIFICATE:

- **Web Technologies - NITTTR, Chennai (Swayam)**

## INTERESTS & HOBBIES:

- Exploring new technologies, frameworks, and tools in software development.
- Solving Rubik's Cube and logical puzzles to improve problem-solving skills.
- Building small games such as Snake Game to practice programming and logic building.
